4. FIRST AID MEASURES

| | |
|-------------|---|
| Inhalation: | Remove to fresh air. If not breathing, give artificial respiration. If breathing difficult, give oxygen. Call a physician if any difficulties persist. |
| Eyes: | Flush eyes with a large amount of water for 15 minutes. Seek medical attention immediately if any irritation persists. After first aid, get appropriate in-plant, paramedic or community medical support. |
| Skin: | Wash affected areas thoroughly with soap and water for at least 15 minutes. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Seek medical attention if any irritation persists. |
| Ingestion | If person can swallow, give 2 glasses of water to drink. DO NOT INDUCE VOMITING! After first aid, seek appropriate in-plant, paramedic, or community medical support. Never give anything by mouth to an unconscious person. |

After first aid, get appropriate in-plant, paramedic, or community medical support.

5. FIRE FIGHTING MEASURES

| | |
|------------------------------------|--|
| Flammability Classification: | Non Flammable |
| Suitable Extinguishing Media: | Water fog, Alcohol foam, Carbon Dioxide, Dry Chemical |
| Unusual Fire or Explosion Hazards: | None known other than material can splatter above 100°C/212°F. |
| Hazardous Combustion Products: | Unknown but carbon monoxide may be released on burning. |

| | |
|------------------------------------|---|
| Fire-Fighting Instructions: | Do not release runoff from fire control methods to sewers or waterways. |
| Fire-Fighting Equipment: | Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-pressure mode. |

6. ACCIDENTAL RELEASE MEASURES

| | |
|-----------------------------------|--|
| Personal Precautions: | Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation |
| Small Spills: | Absorb spill with paper towel or similar absorbent; or flush to sewer or ground with large amounts of water. |
| Large Spills: | For large spills, dike far ahead of liquid spill for later disposal. Do not release into sewers or waterways. Absorb spill |
| Containment: | with vermiculite, oil dry or similar non-reactant absorbent. Solidified product represents no environmental hazard. |
| Cleanup: | Accumulate the absorbed materials and dispose of according to federal, state and local regulations. |
| Environmental Precautions: | Follow applicable OSHA/CERCLA or any other regulations (29 CFR 1910.120) as well as any state or local regulations that may apply. |

7. HANDLING AND STORAGE

| | |
|---------------------------------------|--|
| Precautions for safe handling: | Use the recommended safety controls and personal protective equipment as outlined. Fully review all data before handling of the material itself. Avoid contact with skin or eyes. Avoid breathing dust or mist. Keep from contact with clothing and other combustible materials. Observe good personal hygiene and housekeeping practices. Wash thoroughly after handling. |
| Conditions for safe Storage: | Do not store in direct sunlight. Store in a tightly closed container. Store in a cool dry, well ventilated area. Do not store this material near any strong acids, bases, oxidizers, flammables or any other type of reactive material. Do not expose the material to temperature extremes. Do not store product above 77°F. |
| Regulatory Requirements: | Store materials according to all local, state and federal guidelines that are established for non-regulated chemical products. |

| | |
|---|--|
| Engineering Controls: | |
| Ventilation: | Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (Sec. 2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source. |
| Respiratory Protection: | Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessel, or storage tanks), wear an SCBA. <i>Warning! Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.</i> If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas. |
| Personal Protective Equipment (PPE): | Wear protective eyeglasses or chemical safety goggles, per OSHA eye-and face-protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses. At a minimum wear safety glasses with side shields as well as chemically protective gloves and aprons to prevent prolonged or repeated skin contact. |
| Safety Stations: | Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area. |
| Contaminated Equipment: | Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment. |
| Comments: | Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics. |
| Work/Hygienic Practices | Consistent use of afore-mentioned personal protective equipment is essential in preventing injuries or irritation. |
