	4. FIRST AID MEASURES				
Inhalation:	Remove to fresh air. If not breathing, give artificial respiration. If breathing difficult, give oxygen.				
	Call a physician if any difficulties persist.				
Eyes:	Flush eyes with a large amount of water for 15 minutes. Seek medical attention immediately if any irritation persists. After first aid, get appropriate in-plant, paramedic or community medical support.				
Skin:	Wash affected areas thoroughly with soap and water for at least 15 minutes. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Seek medical attention if any irritation persists.				
Ingestion	If person can swallow, give 2 glasses of water to drink. DO NOT INDUCE VOMITING! After first aid, seek appropriate in-plant, paramedic, or community medical support. Never give anything by mouth to an unconscious person. <i>After first aid, get appropriate in-plant, paramedic, or community medical support.</i>				

5. FIRE FIGHTING MEASURES			
Flammability Classification:	Non Flammable		
Suitable Extinguishing Media:	Water fog, Alcohol foam, Carbon Dioxide, Dry Chemical		
Unusual Fire or Explosion Hazards:	None known other than material can splatter above 100°C/212°F.		
Hazardous Combustion Products:	Unknown but carbon monoxide may be released on burning.		
Fire-Fighting Instructions:	Do not release runoff from fire control methods to sewers or waterways.		

Fire-Fighting Equipment:

Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-pressure mode.

6. ACCIDENTIAL RELEASE MEASURES

Personal Precautions:	Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation
Small Spills:	Absorb spill with paper towel or similar absorbent; or flush to sewer or ground with large amounts of water.
Large Spills:	For large spills, dike far ahead of liquid spill for later disposal. Do not release into sewers or waterways. Absorb spill with
Containment:	vermiculite, oil dry or similar non-reactant absorbent. Solidified product represents no environmental hazard.
Cleanup:	Accumulate the absorbed materials and dispose of according to federal, state and local regulations.
Environmental	Follow applicable OSHA/CERCLA or any other regulations (29 CFR 1910.120) as well as any state or local regulations that
Precautions:	may apply.

7. HANDLING AND STORAGE

Precautions for	Use the recommended safety controls and personal protective equipment as outlined. Fully review all data before handling of
safe handling:	the material itself. Avoid contact with skin or eyes. Avoid breathing dust or mist. Keep from contact with clothing and other combustible materials. Observe good personal hygiene and housekeeping practices. Wash thoroughly after handling.
Conditions for	Do not store in direct sunlight. Store in a tightly closed container. Store in a cool dry, well ventilated area. Do not store this
safe Storage:	material near any strong acids, bases, oxidizers, flammables or any other type of reactive material. Do not expose the material to temperature extremes.
Regulatory	Store materials according to all local, state and federal guidelines that are established for non-regulated chemical products.
Requirements:	

	8. EXPOSURE CONTROLS/PERSONAL PROTECTION						
Components with limit values that require monitoring at the workplace:							
Hazardous Components	CAS Number	ACGIH TLV/TWA STEL	Other				
Sodium Hydroxide	1310-73-2	2 mg/m3	2 mg/m3				
Sodium Nitrite	7632-00-0	None Est.	None Est.				
Engineering Controls:							
Ventilation:	Provide general or local exhaust vent Local exhaust ventilation is preferred its source.						
Respiratory Protection:	Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessel, or storage tanks), wear an SCBA. <i>Warning! Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.</i> If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.						
Personal Protective	Wear protective eyeglasses or chemical safety goggles, per OSHA eye-and face-protection regulations (29 CFR						
Equipment (PPE):	1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses. At a minimum wear safety glasses with side shields as well as chemically protective gloves and aprons to prevent prolonged or repeated skin contact.						
Safety Stations:	Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.						
Contaminated	Separate contaminated work clothes	Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your					
Equipment:	shoes and clean personal protective	shoes and clean personal protective equipment.					
Comments:	Never eat, drink, or smoke in work a	reas. Practice good personal hy	giene after using this material, esp	pecially before			
	eating, drinking, smoking, using the t	oilet, or applying cosmetics.					
Work/Hygienic Practices	Consistent use of afore-mentioned p	ersonal protective equipment is	s essential in preventing injuries of	r irritation.

10. STABILITY AND REACTIVITY					
Stability: This product is stable at room temperature in closed containers under normal storage and handling condit					
	However, avoid temperature extremes.				
Conditions to Avoid:	Excessive temperature, contact with any type of reactive chemicals				
Hazardous Polymerization:	Hazardous polymerization will not occur.				
Chemical Incompatibilities:	Avoid contact with Strong Acids, Strong Alkalis, Oxidizers or any other type of reactive material.				
Hazardous Decomposition	There are no known hazardous decomposition products for this material unless the material is burned in which				
Products:	case undetermined evolution of toxic gases may occur.
