

- True Union Design | Easy Installation
- All Thermoplastic Material | Corrosion-Free
- Cost Effective

CalPro Series Calibration Columns

The Truflo® CalPro® Series Calibration Columns have been Engineered to Measure the Flow Rates of Chemical Metering Pumps.

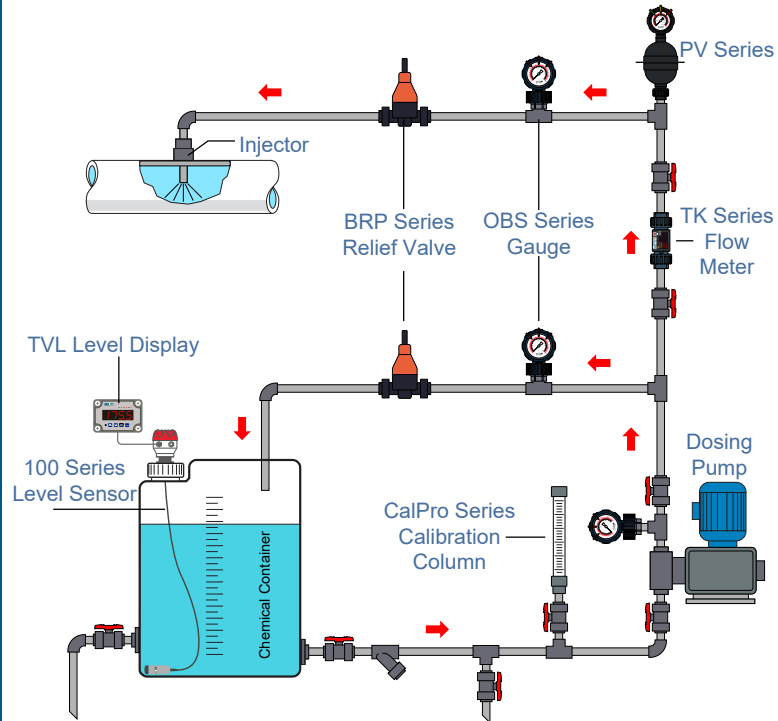

The CalPro® Series units provide an economical method for determining pump flow rate using standard graduations of milliliters | minute (ml/min)

Truflo® CalPro® Series Calibration Columns offer accurate testing of metering pump flow rates by measuring the draw down rate on the suction side, while leaving the discharge undisturbed in its normal steady state operation condition.

The CalPro® Series come equipped with True Union or Flanged end connections.

Dosing System Schematic

Features

- Size Range 100ml - 10,000ml
- True Union Socket or NPT Connections
- Sizes 1/2" to 2" Options
- Connections Easy to Read and Clean
- Quick Installation

Column Size	Size	H	W	GPH
100ml	1/2"	13.0"	1.25"	1.5
200ml	1/2"	14.5"	1.6"	3.0
300ml	1/2"	14.5"	2.0"	4.5
400ml	1/2"	17.75"	2.0"	6.0
500ml	1/2"	15.75"	2.5"	7.5
1000ml	1/2"	20.0"	2.5"	16
2000ml	3/4"	33.5"	3.0"	32
3000ml	1"	27.0"	4.3"	48
4000ml	1"	32.0"	4.3"	64
6000ml	1 1/2"	41.5"	4.3"	96
8000ml	1 1/2"	39.0"	1.6"	128
10000ml	2"	46.0"	1.6"	150
